

The Wisconsin Do Not Call list should be left intact. People who sign up for it know that it is stronger than the Federal list, and that is the primary reason for choosing to be on both lists. If someone would want to receive marketing calls, as the detractors to Wisconsin's list are saying, then they either wouldn't sign up for either list, or would only sign up for the Federal one. It has been a wonderful blessing to not have telemarketers continually making unwanted calls. Please leave the Wisconsin list intact. Thank you.
